

10-YEAR Projection

Project yourself into the future 10 years.

How old are you? What is your life like? How have your personal, family, and career circumstances changed? Make an effort to be as realistic and objective as possible.

In completing this projection, you face two questions repeatedly:

- *Should I describe my future the way I want it to be? -- OR --*
- *Should I describe my future the way I really think it will be?*

You probably will allow both factors to enter into your answers. Such a solution is both natural and desirable. This projection is for your benefit. No one but you will see it unless you share it.
